'Sewage water' brings honours to lecturer

By: (Thu, 09 Apr 2009)

SHAH ALAM (April 9, 2009) : A study to turn sewage water into clean water has brought fortunes to Universiti Teknologi Mara (UiTM) lecturer Prof Dr Ku Halim Ku Hamid.

Early this month, he won three gold medals at the 37th International Exhibition of Inventions, New Techniques and Products in Geneva, including one for the "Integrated Biological Sewage Treatment System".

He has also won a Special Award from Romania for the study that began four years ago at the residential college of the university's main campus here.

Over the past two months, the system was on trial and would be applied in Jeddah in the next three months, said the lecturer from the Chemical Engineering Faculty at a press conference here yesterday.-- Bernama
