GRADUATE SCHOOL OF BUSINESS
FACULTY OF BUSINESS AND ACCOUNTANCY

DOCTOR OF PHILOSOPHY
The PhD programme at the Faculty of Business and Accountancy is the result of a careful analysis and examination both of other doctoral programmes and the emerging needs of teachers and researchers in the 21st century. One innovation is the development of foundation courses required of all doctoral students.

The faculty’s Doctor of Philosophy programme offers an intensive, stimulating and challenging learning experience that will provide you with a broad foundation of knowledge in the main areas of business administration, management and accountancy.

MASTER OF BUSINESS ADMINISTRATION
Our core mission is to train highly competent managers and leaders that will advance Malaysian industry and nation building. The faculty strives to prepare students for the many challenges of business and we do this by providing a well-thought out curriculum that balances academic rigor and practical skill.

Courses are structures to provide a deep understanding of theories but students are also exposed to many unique real-world problems that arise sometimes outside of the clear boundaries of textbook theories. Through a combination of lectures, case studies, written assignments, group projects, presentations and class discussion, each student leaves us armed with the knowledge and flexibility necessary to understand environmental challenges and prepared to plan and implement real-world solutions.

There is, however, a growing need for graduate level management education among cross-section of industry players and few of these aspiring graduate students can afford to take full-year off work. The UMGSB with its long experience in providing management education is now able to cater to this group with its part-time Master’s programme in Management that is open to all individuals who meet the admission requirements.
