University Putra Malaysia (UPM) Faculty of Design and Architecture (FRSB) established a smart partnership expertise in landscape and environmental research recently in the field based on sustainable development and green technology.

Deputy Vice-Chancellor Prof. Datuk Ir. Dr. Mohd Saleh Jaafar said, "UPM's commitment with Perbadanan Putrajaya (PPj) helps to share resources and training to students needs." He added, "UPM will also generate knowledge through publishing, teaching, industry and community networks."

Meanwhile, PPj President Tan Sri Samsudin Osman said, "UPM can help in the management and urban planning, architecture and landscape through a futuristic design to give students a chance."

He also said that both parties are able to optimize use of resources through the sharing of knowledge, technology and infrastructure in the field of green technology in line with the implementation of Blue Ocean Strategy, which was introduced by the government under the Government Transformation Programme.
